

# Animal Care Workshop

## Friday March 10 (12:30 - 4:30)

### Workshop Description

The Canadian Association of Fairs and Exhibitions has developed, with the input and guidance of animal care experts from across Canada, a best practices program to build public trust at public events in relation to animal care specifically. Our goal with this project is to ensure that agricultural community events and activities with animals that interact with the public have the tools and knowledge to educate the public and be best prepared when it comes to agriculture and animal interaction in order to grow and develop public trust in the agricultural industry. There is a national need to inform the public about animal handling at public events and venues. This project will help create a national guideline for public events in regards to animal care.

In order to help out our delegates as far as expenses are concerned - we will be able to cover the cost of 1 hotel room for 1 night per Agricultural Society. Book your hotel room and SAASE will reimburse you for the one night when the convention is completed and an expense form has been provided. More than 1 delegate from each Agricultural Society can attend, but only 1 night of hotel per Agricultural Society will be reimbursed.
